W. C. T. U. NOTES.

(By MELISSA S. FELLOW.)

The September meeting will be at the home of the president as a social given to the public. Everybody invited.

Scientific temperance in the schools of our land has now reached a standing that all publishers of physiologies have included it in their texts. Faithful teachers will impress the facts so that the next generation can not ignorantly sin against their bodies in using the poisons to gratify perverted appetite. The W. C. T. U. love the boys and girls, hence the stress laid on this subject.

The state convention is to be held at Kingfisher the 23d-24th-25th. The County president of Beaver is on program to respond to the welcome address for the Northwest of our state. Lack of funds in our treasury will bar her attendance. Mrs. Lila Carlan Moore, a national organizer, is to be there and give some dates in Oklahoma, before and after the convention.

The L. T. L. pins are enjoyed by those who have them. The next meeting will be in October on Saturday.

Our library is appreciated by many of the country people as well as the citizens at home. The Alcott, Stahl, Gullik and other series have been widely read. A few books are out yet that should be returned. Will all who have used the library please see that returns are made according to regulations printed in the book.

Dizzy? Bilious? Constipated?

Dr. King's New Life Pills will cure you, cause a healthy flow of bile and rid your stomach and bowels of waste and fermenting body poisons. District No. 181

After a long siege of hard farm work we come again to give you a few items.

The broomcorn is nearly all pulled now and the balers are getting it into bales ready for market as fast as they can. It is now selling from \$140.00 to \$160.00 per ton. No doubt it will reach the \$200.00 mark in the next 30 or 60 days.

The Broom Corn Growers' Association held an all-day meeting at Knowles Saturday, September 5th, and had the contracts all signed up with the contractors to build them a fine warehouse at that place. Work will begin on the building at once.

Mrs. H. C. Gray and son William took a trip to Goodwell the first of last week to take Miss Mary Gray and Miss Alice Sprague to the P. A. I. where they will seek to prepare themselves for future usefulness with the help of the splendid faculty employed at that place. This being Mrs. Gray's first trip through that part of the country she was interested in the general appearance of the farms along the way and reports crops as looking fine all the way. She was also much and agreeably surprised with the College buildings and equipment, the dormitory and farm and farm buildings. The new dormitory just being built is going to be fine with all modern conveniences. The crops there are extra fine and in good shape, not a weed to be seen and the grounds and trees are beautiful. Prof. Black knows how to do things and does them. It will pay anyone wishing to make a little trip to run out there and see things for themselves.

MORE FROM THE UNSCIENTIFIC SCIENTIST.

San Diego Exposition, July 14, 1914. Dear Herb:—Did you get that "logos of Ethnos" stuff that I put over in my last? Good—what? I was going to have it printed in Greek, but I didn't have the nerve—and the printer didn't have the type—so I refrained. I looked it up afterwards lest I had made a mistake, but I was right. Ethnology is a sort of a giny (if that's the way you spell it) expression. It comes from a couple of Greek words—it can't help that, of course—and they mean the study of you and me from the time. "When you were a tadpole and I was a fish."

In the Paleozoic days' as the poet hath it. At least that's a fairly liberal translation of what they mean.

However, I didn't intend to spend any more language on that—no sense in lingering upon a subject after one has exhausted it. But I must tell you all about Archaeology, which is in the same class with the other ology. I said they were cousins. They're more than that. Eth and Arch are brother and sister—the I'm not sure which is which as to gender. But Arch is the study of the relics of the early races of mankind—you might not think it, but it's a fact. I nosed around on the quiet for a while trying to find out. Then I asked the Chief's stenographer what the—I mean I asked her what it signified. She told me that right off the bat, but to make sure of it somebody dug up a dictionary. One of those dinky, near-leather-covered ones that you get for 19 cents in real money—and about 40,000 coupons that you cut serialim out of a daily paper. I got one that way once. Got a book of songs too—the oldest songs in the world. The paper said they were songs that never grow old, vintage of the past century, you know. Vintage suggests wine, and—well, anyway, if I had been writing the title on the cover of the song book I'd have said "Songs that Improve with Age." But—as I was going to say when I ran into that open switch—I was agreeably surprised to find that the unpretentious dictionary was a perfectly good book. It said just the same thing that the girl said—minus the smile.

One of the things one never can get back is wasted energy. I figure that I'm out about four dollars' worth, because while I was fussing around with

those tomes—tomes, I mean—and dictionaries, et cetera (I spell that since I broke into the high-brow class) I could just as well have learned all about the subject under discussion by strolling in at the Archaeological Exhibit at this San Diego Exposition and just rubbering. Really that's how I finally did get wise!

You know Baby Eleanor, reading the funnies in the Sunday Supplements, has just as much fun as if she could read the printed matter. Me too! I don't need the tomes when I can see the exhibit. Come on in and soak up some knowledge.

Some of these subjects seems a little heavy at first, but really it's easy to grasp them in this atmosphere. I'm there with bells on now, old top, and you can quote me with impunity or verbally—either way—and if you don't understand Archaeology yet, just ask me for anything that I have overlooked. Yours for archives of mankind.

SCOTTY.

P. S. Note the delicate, adroit way in which I insert an adv. for the San Diego Exposition in the midst of pure reading matter! I get paid for that.
